

Dear Fellow Employer:

I would like to invite you to take advantage of an unbelievable program offered by our company—**Dr. Aziz Clinic**, treating the most common acute health problems for *\$1 per visit*. As a small business owner, I have seen our health care expenses skyrocketing. Many large employers have set up their own clinics to cut the cost of urgent-care visits as well as to provide preventive and wellness programs.

Whether you are offering health insurance or not, this program is the first step toward keeping your employees healthy and at work. They will be happy to know you care about their health through your small investment of \$95.00 annually per employee, and they will be part of an elite membership having exclusive access to our clinic. Membership is also open to individuals at your company or to their family members. Many generic medications will be offered to members at less than \$5.00, and many other medications, vaccinations, and other great services will be discounted.

Since 1988, Dr. Aziz Pharmacy has been the leader in providing quality, discounted medications, and this clinic, with its new approach, is a continuation of our tradition.

We encourage you to **act fast by calling us at (317) 842-5771** to begin registration of your employees. Upon completion of the elite membership of 3000 people, we will close the registration to ensure accessibility to our members. If you have any additional questions, please give me a call.

Sincerely,

A handwritten signature in black ink that reads 'Hamid Abbaspour'.

Hamid Abbaspour, R. Ph., MBA

Founder and President (brief biography at <http://bit.ly/bliLss>)

Benefits for Employers

- **capped acute-care costs:** fewer unnecessary claims keeps premiums down
- **improved productivity:** timely care keeps more employees in their seats and prevents cross-infection
- **better morale:** eliminates employee worries about health care
- **additional employee benefit:** gives your company the competitive advantage to retain good employees
- **supports insured/uninsured personnel:** workers covered, even if insurance doesn't extend to them or provides catastrophic coverage only
- **conformity to back-to-work policies:** a single, trusted source for medical decisions

Benefits for Employees

- **fast service:** shorter wait because acute conditions can be treated rapidly
- **no appointments necessary:** first-come, first-serve care for an elite membership
- **better health:** early medical attention often avoids complications
- **reduced insurance hassles:** fewer preapprovals/copays/paperwork /phone calls
- **acute-care savings:** preserves HSA/FSA funds for more challenging and unusual medical needs
- **peace of mind:** employees know they don't need to avoid medical attention just because of the cost
